Transfusion of untested blood to Children

2249. SHRI SANTOSH BAGROD1A: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that doctors are transfusing blood to children who are suffering from weakness of mild anaemia;

(b) whether it is also a fact that most of the blood is untested and is likely to transmit the AIDS virus in healthy kids;

(c) whether it is also a fact that in one study on 27 HIV positive children, 12 were found to have been infected from this treatment; and

(d) if so, the steps taken by Government in this regard?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRI A. RAJA): (a) No, Sir.

(b) No, Sir.

(c) and (d) A study was conducted in AIIMS, on 27 children with HIV infection who reported to them over a 4 year period. Among other findings, it was found that in 12 of 27 children contaminated blood transfusion seems to have been the source of infection. The Government has taken a number of steps to contain infections being transmitted through transfusion, such as, (i) Testing of each unit of
